SUBJECT INDEX

acetaldehyde utilization by *Leuconostoc*, 802
acetate differential agar, comparison with Sellers citrate agar, 886
acetate metabolism, kinetics during sludge digestion, 368
acridines, prevention of drug resistance in bacteria by, 879
adenine, distribution in seawater, 145
adenovirus vaccines, potency of, 839
aerosol sampling, in cold weather, 133
aerosols, bacteriophage, effect of air ions on, 888
aerosols, control by differential air pressure zones, 674
aflatoxin, microbial detoxification of, 934
aflatoxin, production by *Aspergillus flavus*, 826, 1019
aflatoxin, sensitivity of microorganisms to, 403
aflatoxins, production by *Aspergillus*, 139, 378, 381
aflatoxins, production by *Penicillium*, 139
aflatoxins, production on rice, 425
agar, effect on inhibitory action of phenols, 196
agglutination test for *Pasteurella tularensis*, 267
airborne organisms, slit sampler for collection of, 328
airborne sonic waves, sterilizing effects of, 732
airborne spores, contamination of food containers by, 905
airborne viruses, removal from air, 497
airborne viruses, survival of, 361
air-sampling system for upper atmosphere, 229
alanine, production by *Fusarium moniliforme*, 39
alcohols, metabolism by *Pseudomonas*, 156
algae, gas exchange of, 552
algicidal effect of chlorine and bromine, 8
algistatic activity of fatty nitrogen compounds, 308
alkali, effect on tuberculocidal activity of phenates, 137
Alternaria, solubilization of cellulose by enzyme system of, 1015
amino acid requirements of *Bacteroides*, 1022
amino acids, production by *Phlebopus*, 331
6-aminopenicillanic acid, acylation by *Penicillium chrysogenum*, 1047
6-aminopenicillanic acid, formation by fungi, 98
anaerobic incubator, improved, 135
anaerobic pouch, use in isolating *Clostridium botulinum* from meats, 223
anaerobic system, self-contained, 985
animal assay for *Clostridium perfringens* food poisoning, 479
animal isolation facility, control of aerosols in, 674
antibiotic, new, U-21963, 506, 511
antibiotic, production by a marine bacterium, 649
antibiotic assay of clinical specimens, 170
antibiotic from soil bacillus, 79
antibiotic properties of malformin, 475
antibiotic-producing capacity of fungi, 105
antibiotics, polyene, antifungal activity of, 865
antifungal activity of polyene antibiotics, 865
antifungal antibiotics, effect on *Candida albicans*, 953
antiviral activity of 1,3-bis(2-chloroethyl)-1-nitrosourea, 405
apparatus for controlling culture media, 1045
ascites fluid, *Bordetella pertussis* antibody in, 693
ascites fluid as source of plant virus antibodies, 834
Aspergillus, production of aflatoxins and kojic acid, 139
Aspergillus flavus, aflatoxin production by, 378, 826, 1019
Aspergillus parasiticus, aflatoxin production by, 381
assay, antibiotic, simplified method for, 170
assay of *Coxiella burnetii*, 767
assay of staphylococcal enterotoxin B, 284
automation of identification of streptococci, 386

Bacillus, action of chloramphenicol on, 850
Bacillus lentimorbus, stabilization of, 161
Bacillus popilliae, stabilization of, 161
Bacillus popilliae, vegetative growth of, 189
Bacillus stearothermophilus, spore production by, 690
Bacillus subtilis, airborne, collection of, 328
Bacillus subtilis broths, nucleotide degradation in, 297
bacteriocin-like substance active against *Clostridium botulinum*, 616
bacteriophage, *Escherichia coli*, estimation of, 141
bacteriophage aerosols, effect of air ions on, 888
bacteriophage assay, use of end point dilution method in, 468
bacteriophages, filters for removal from air, 497
bacteriophages of lactic streptococci, storage of, 421
bacteriostatic activity of fatty nitrogen compounds, 308
bacteriostatic substances from *Phlebopus*, 331
Bacteroides, nutritional requirements of, 1022
beef, determination of microbial quality of, 492
biodegradation of pesticides, 486
1,3-bis(2-chloroethyl)-1-nitrosourea, antiviral activity of, 405
bone meal, isolation of *Salmonella* from, 711
Bordetella pertussis antibody, production of, 693
boticin E, substance active against *Clostridium botulinum* type E, 616
bromine, effect on *Chlorella pyrenoidosa*, 8
bromine as disinfectant of swimming pool water, 276

calves, bacterial counts of ileal digesta and feces from, 70
canavanine, effect on proteinase synthesis, 337
Candida, medium for isolation of, 525
Candida albicans, effect of polyene antibiotics on, 953
Candida albicans, in mouse infections, 737
carbohydrate utilization in the rumen, 60
carbon sources, effect on *Claviceps purpurea*, 320
carboxymethylcellulose ether media for aerosol sampling, 133
catabolite repression, effect on bacterial communities, 654
cellulolytic activity of fungi, 892
cellulose, solubilization by *Alternaria* enzyme system, 1015
cephalosporin synthesis, role of methionine in, 746
Chaetomium globusum in corn, 774

cheese, elimination of staphylococci from milk for, 584
cheese whey, use for vitamin B_{12} production, 353, 356, 359
chloramphenicol, action on *Bacillus*, 850
Chlorella pyrenoidosa, effect of bromine and chlorine on, 8
chlorine, effect on *Chlorella pyrenoidosa*, 8
chlorine as disinfectant of swimming pool water, 276
Citrobacter, differentiation from *Salmonella*, 178
Claviceps purpurea, effect of carbon sources on, 320
clean rooms, microbial contamination of, 203, 539
clinical specimens, antibiotic assay of, 170
Clostridium botulinum, activity of boticin E against, 616
Clostridium botulinum, isolation from fish, 301
Clostridium botulinum, isolation from fresh meats, 223
Clostridium botulinum, presence in natural waters, 837
Clostridium botulinum spores, outgrowth of, 49
Clostridium perfringens, food poisoning caused by, 479
Clostridium perfringens, in turkey stuffing, 914
Clostridium spores in raw meat, 789
Clostridium tetani, presence in metropolitan area, 993
cobalt, influence on fermentative methylation, 280
Coffea robusta cherries, degradation of mucilage layer of, 256
coliform bacteria, effect on *Staphylococcus aureus* growth, 124
Columbia SK group viruses, survival of, 361
colonial types of *Escherichia coli*, 152
combined action of drugs, 299
corn, ensiled, microbiology of, 31, 35
corn, invaded by *Chaetomium globosum*, 774
corn steep liquor, effect on *Aspergillus*, 381
coumermycin, fractions of, 280
coxsackie B-1 virus, salivary excretion of, 394
Coxiella burnetii, assay of, 767
crabmeat, irradiated, microbial flora of, 411
crabmeat, *Trichosporon* species from, 110
culture flask system, self-contained, 685

Dasytricha ruminantium, culture of, 340
decontaminant for enclosed areas, 989
decontamination of inanimate surfaces, 295
density gradients, freeze-cutting of, 687
dermatophytes, growth of, 438
dermatophytes, oxidative metabolism of, 973
Desulfovibrio, growth on agar media, 529
detection of bacterial cells, method for, 979
diaminopimelic acid in rumen contents, 27
dibenzocycloheptenes, prevention of drug resistance in bacteria by, 879
2,4-dichlorophenol, effect on soil organisms, 724
2,4-dichlorophenoxyacetic acid, uptake by *Pseudomonas fluorescens*, 486
disinfectants for swimming pool water, 276
drug resistance of bacteria, prevention of, 879
drycleaning, microbiology of, 1
durhamycin, pentaene antifungal antibiotic, 754

ecology of psychrophilic microorganisms, 74
Emericellopsis glabra, mutagenic action of radiation on, 105
enteric pathogens, elimination of paracolons from consideration as, 886
Enterobacteriaceae, biochemical differentiation of, 212
enterotoxin, staphylococcal, effect on monkeys, 445
enterotoxin, thermal inactivation of, 130
enterotoxin A, production of, 966
enterotoxin B, assay of, 284
enterotoxin production in meat, 372
enterovirus, recovery from foods, 218
enzyme stimulation by canavanine, 337
enzyme system from *Alternaria*, 1015
Erwinia, pigment formation by, 870
Escherichia, uricolysis by, 474
Escherichia coli, activity of vancomycin against, 902
Escherichia coli, colonial morphology, 152
Escherichia coli, foam separation of, 778
Escherichia coli bacteriophage, estimation of, 141
extraterrestrial life, detection by fluorescent labeling of microorganisms, 119

fabrics, survival of microorganisms on, 1
fabrics as disseminators of viruses, 55
fat content of milk, effect on thermal resistance of bacteria, 716
fatty acids, inhibition of lipases by, 699
fatty nitrogen compounds, activity of, 308
feces from calves, bacterial counts in, 70
feces of food handlers, organisms in, 928
fermentative methylation, influence of cobalt on, 280
filters, for removal of bacteriophages from air, 497
fish, effect of radiation on microflora of, 261, 957
fish, isolation of *Clostridium botulinum* from, 301
fish, microflora during storage, 921
fish, relation of intestinal flora to pollution, 429
fish homogenate, medium for selection of *Salmonella* from, 12
fluorescein assay, rapid, 271
fluorescent labeling of microorganisms as life-detection technique, 119
fluorescent-antibody conjugates, rapid assay for, 271
fluorometry, identification of streptococci by, 386
foam separation of *Escherichia coli*, 778
food containers, contamination by bacterial spores, 905
food handlers, organisms in feces from, 928
food ingredients, sporeforming bacteria in, 623
food microorganisms, influence on enterotoxin production, 372
food pathogens, radiation survival of, 92
food poisoning, from *Clostridium perfringens*, 479
foods, frozen, bacterial content of, 21
foods, medium for selection of *Salmonella* from, 12
foods, recovery of enterovirus from, 218
foods, thermal resistance of organisms in, 815
foodstuffs, bacterial contamination, 711
foot-and-mouth disease virus, inactivation of, 86
foot-and-mouth disease virus, influence of salts on, 206
freeze-cutting of density gradients, 687
frozen foods, bacterial content of, 21
frozen storage, survival of lactic streptococci in, 665
fruit storage in controlled atmospheres, 579
fungi, antibiotic-producing, 98, 105
fungi, cellulolytic activity of, 892
fungi, filamentous, growth of, 438
fungistatic activity of fatty nitrogen compounds, 308

fungistatic effects of controlled atmosphere, 579
fungus cultures, liquid nitrogen refrigeration of, 784
Fusarium moniliforme, production of alanine by, 39

β-galactosidase for distinguishing *Citrobacter* and *Salmonella*, 178
gas chromatography, detection of bacteria by, 513
gas decontamination of inanimate surfaces, 295
glycerol production, 292
glucose, as carbon source for *Claviceps purpurea*, 320
glucose disappearance in biological treatment systems, 857
gradient plate for use in virus plaque technique, 470
guanosine-5′-monophosphate, production by fermentation, 821

hemagglutination inhibition test, detection of virus by, 346
herbicide, effect on soil organisms, 724
humidity, effect on survival of bacteria on metal, 303

ileal digesta from calves, bacterial counts in, 70
immunofluorescence staining, detection of virus by, 346
in vitro identification of *Clostridium tetanii*, 993
indigoidine, formation by *Erwinia*, 870
inoculators, automatic, 697
inosine-5′-monophosphate, production by fermentation, 821
iodine as disinfectant of swimming pool water, 276
iodine-resistant bacteria in swimming pools, 627
irradiated seafood, microbial flora of, 411
irradiation, effect on microflora of fish, 957
isovalerate carboxylation pathway of leucine biosynthesis, 807

kidney, artificial, concentrated bath solution for, 45
kojic acid, production by *Aspergillus* and *Penicillium*, 139

lactic acid bacteria, effect on *Staphylococcus aureus* growth, 251
lactic acid bacteria, in vegetable-processing plant waste waters, 115
lactic acid bacteria, malo-lactic strains of, 608
lactic streptococci, bacteriophages of, 421
lactic streptococci, survival in frozen storage, 665
lactobacilli, suppression of *Leuconostoc mesenteroides* during isolation of, 1044
leucine biosynthesis in the rumen, 807
Leuconostoc, acetaldehyde utilization by, 802
Leuconostoc mesenteroides, suppression during isolation of lactobacilli, 1044
lincomycin, action on staphylococci, 582
lipases, inhibition by fatty acids, 699
lipid, role in protection of *Staphylococcus aureus*, 769
liquid nitrogen preservation of *Saccharomyces carlsbergensis*, 456, 462
liquid nitrogen refrigeration of fungi, 784
luminescent bacterial colonies, isolation of, 692
lyophilization, preservation of *Serratia marcescens* by, 561, 568
lysine-iron-agar, use in differentiation of *Enterobacteriaceae*, 212

magnesium ion, effect on vancomycin activity, 902
malformin, antibiotic properties of, 475
malo-lactic bacteria, wines fermented with, 608
marine bacterium, production of pyrrole antibiotic by, 649
meat, *Clostridium* spores in, 789
meat, enterotoxin production in, 372
meats, isolation of *Clostridium botulinum* from, 223
medium for isolation of *Candida*, 525
medium for rumen bacteria, 794
medium for selection of *Salmonella*, 12
medium for testing motility, 670
membrane filtration, use to isolate organisms from raw milk, 535
metal, survival of bacteria on, 303
metallic salts, inhibition of nucleotide degradation by, 297
methionine, role in cephalosporin synthesis, 746
microbial contamination on flat surfaces, 203
Microsporum quinckeanum, growth of, 438
milk, isolation of organisms from, 535
milk, *Pseudomonas fragi* in, 716
milk products, effect of acetaldehyde on, 802
mixed culture system, 761
motility, medium for testing, 670
mycobacteria, isolation of, 603
mycoplasmas, growth of, 1049

nitrogen removal from combined sewage components, 679
p-nitrophenylglycerine, inhibition of *Proteus* swarming by, 873
nonsporeforming bacteria, thermal resistance of, 416
nuclear magnetic resonance spectra of water in yeast cells, 466
nucleotide degradation in *Bacillus subtilis* broths, 297

olives, pure culture fermentation in, 1027
oysters, irradiated, microbial flora of, 411

pantothenic acid, biological assay of, 462
parainfluenza virus vaccine, response to, 558
Pasteurella, survival on metal, 303
Pasteurella haemolytica, medium for, 597
Pasteurella pestis, effect of environment on, 742
Pasteurella pestis, shaken suspensions of, 636
Pasteurella tularensis, agglutination test for, 267
penicillin acylase, formation by fungi, 98
penicillins, formation by fungi, 98
Penicillium, production of aflatoxins and kojic acid, 139
Penicillium chrysogenum, acylation of 6-aminopenicillanic acid by, 1047
pesticides, biodegradation of, 486
*p*H, effect on *Clostridium botulinum* spores, 49
*p*H, effect on continuously cultured rumen ecosystem, 573
phenates, tuberculocidal activity of, 137
β-phenethyl alcohol, inhibition of *Proteus* swarming by, 873
phenols, effect of agar on inhibitory action of, 196
phenothiazines, prevention of drug resistance in bacteria by, 879

Phlebopus, amino acid production by, 331
Phlebopus, pigmented bacteriostatic substances from, 331
phosphorus removal from combined sewage components, 679
photosynthesis of *Chlorella pyrenoidosa*, 552
pigment formation by *Erwinia*, 870
pimaricin, effect on *Saccharomyces cerevisiae*, 451
plant virus antibodies, ascites fluid as source of, 834
plastic food containers, contamination by bacterial spores, 905
poliomyelitis virus, persistence on fabrics, 183
pollution, intestinal flora of fish as indicators of, 429
pollution, *Salmonella* as index of, 591
polyene antibiotics, antifungal activity of, 865
polypeptide antibiotic 4205 from soil bacillus, 79
potassium, loss in *Candida albicans* caused by antibiotics, 953
preservation of fungi, 784
β-propiolactone vapor decontamination, 989
Propionibacterium shermanii, vitamin B_{12} production by 353, 356, 359
protein assay, rapid, 271
proteinase biosynthesis in *Streptococcus faecalis*, 337
proteinase of *Trichosporon* species from crab meat, 110
Proteus, effect on *Staphylococcus aureus* growth, 124
Proteus, inhibition of swarming of, 873
Pseudomonas, metabolism of alcohols by, 156
Pseudomonas fluorescens, adaptation to low levels of water activity, 899
Pseudomonas fluorescens, 2,4-dichlorophenoxyacetic acid uptake by, 486
Pseudomonas fragi, thermal resistance in milk, 716
psychrophilic microorganisms, ecology of, 74
pyridoxine, biological assay of, 456
pyrrole antibiotic, production by marine bacterium, 649

quantitation of live bacteria in presence of dead cells, 1054

rack for tissue cultures, 1042
radiation, effect on microflora of freshwater fish, 261
radiation, mutagenic action on *Emericellopsis glabra*, 105
radiation survival of food pathogens, 92
radiation-pasteurized fish, microflora during storage, 921
relative humidity, effect on *Pasteurella pestis*, 742
reoviruses, type-specific antisera to, 1051
rhizosphere studies, rapid replica plating in, 695
rhodanese, production of *Thiobacillus denitrificans* for, 998
rice, aflatoxin production on, 425
rumen, bacterial growth in, 27
rumen, carbohydrate utilization in, 60
rumen, diaminopimelic acid in, 27
rumen, leucine biosynthesis in, 807
rumen bacteria, medium for, 794
rumen ecosystem, fermentation in, 573
rumen holotrich ciliates, culture of, 340
rumen microbiota, conversion of substrates to volatile fatty acids by, 1004

Saccharomyces carlsbergensis, use in assay of pantothenic acid, 462
Saccharomyces carlsbergensis, use in vitamin B_6 assay, 456
Saccharomyces cerevisiae, effect of pimaricin on, 451
Saccharomyces cerevisiae, effect of steroids on, 397
Saccharomyces cerevisiae, in wine fermentation, 643
Salmonella, differentiation from *Citrobacter*, 178
Salmonella, enrichment medium for, 12
Salmonella, isolation from bone meal, 711
Salmonella, isolation from streams, 591
Salmonella, thermal resistance of, 805
salts, influence on foot-and-mouth disease virus, 206
Sarcina lutea, survival on metal, 303
seafood, bacteriophage assay for, 468
seafoods, irradiated, microbial flora of, 411
seawater, organic compounds in, 145
Sellers citrate agar, comparison with acetate differential agar, 886
Separan NP10, viscosity-producing substance, 836
serial dilution technique with self-filling syringes, 472
Serratia marcescens, airborne, collection of, 328
Serratia marcescens, preservation of, 561, 568
Serratia marcescens, survival on metal, 303
Serratia marinorubra, requirement for organic compounds, 145
sewage components, effect of combination on microbial activity, 679
sewage sludge, acetate metabolism during digestion of, 368
sewage treatment systems, glucose disappearance in, 857
sludge, effect of combination with domestic sewage, 679
sludge digestion, kinetics of acetate metabolism during, 368
sodium chloride, effect on *Clostridium botulinum* spores, 49
sodium tetradecyl sulfate, inhibition of *Proteus* swarming by, 873
soil bacillus, polypeptide antibiotic 4205 from, 79
soil organisms, effect of Zytron on, 724
sonic waves, sterilizing effect of, 732
space missions, bioregenerative life-support systems for, 552
spacecraft, clean rooms for assembly of, 539
spacecraft sterilization by sonic waves, 732
spoilage of beef, 492
sporeforming bacteria in food ingredients, 623
spores, airborne, contamination of food containers by, 905
spores, *Clostridium*, in raw meat, 789
spores, *Clostridium botulinum*, isolation from meats, 223
spores, *Clostridium botulinum*, outgrowth of, 49
spore production by *Bacillus stearothermophilus*, 690
sporulation of *Bacillus*, 161
staphylococcal enterotoxin B, assay of, 284
staphylococcal enterotoxin B, thermal inactivation of, 130
staphylococcal enterotoxin poisoning in monkeys, 445
staphylococci, growth in meat, 372

staphylococci, action of lincomycin on, 582
Staphylococcus, thermal resistance of, 805
Staphylococcus aureus, effect of lactic acid bacteria on, 251
Staphylococcus aureus, effect of other bacteria on growth, 124
Staphylococcus aureus, protection against trichlorophenol, 769
Staphylococcus aureus, thermal resistance of, 584
statistical evaluation of methods of determining bacterial populations, 845
sterilization with sonic waves, 732
steroid interference with polyene antibiotics, 865
steroids, effect on yeast viability, 397
streams, isolation of *Salmonella* from, 591
streptococcal bacteriophages, storage of, 421
streptococci, identification by fluorometry, 386
streptococci, survival in frozen storage, 665
Streptococcus faecalis, proteinase biosynthesis in, 337
Streptomyces durhamensis, antibiotic from, 754
Streptomyces griseus, streptomycin production by, 706
Streptomyces rishiriensis, coumermycin from, 280
streptomycin, media for production of, 706
submerged culture of *Aspergillus flavus*, 1019
substrate utilization by heterogeneous bacteria, 654
succinic acid, as carbon source for *Claviceps purpurea*, 320
sulfadiazine, combined action with trimethoprim, 299
surfactants, nitrogen-containing, activity of, 308
swarming of *Proteus*, inhibition of, 873
swimming pool disinfectants, 278
swimming pools, iodine-resistant bacteria in, 627

T1 bacteriophage aerosols, effect of air ions on, 888
Tergitol-7 medium, colonial morphology of *Escherichia coli* on, 152
thermal inactivation of endotoxin, 130
thermal inactivation of staphylococcal enterotoxin B, 130
thermal resistance of nonsporeforming bacteria, 416
thermal resistance of *Staphylococcus aureus*, 584
Thiobacillus denitrificans, production for rhodanese, 998
threonine, distribution in seawater, 145
tissue cultures, rack for, 1042
trichlorophenol, protection of *Staphylococcus aureus* against, 769
Trichoderma viride, antibiotic from, 506, 511
Trichosporon species from Dungeness crab meat, 110
trimethoprim, combined action with sulfadiazine, 299
tuberculocidal activity of phenates, 137
turkey stuffing, *Clostridium perfringens* in, 914

U-21963, new antibiotic, 506, 511
ultraviolet radiation, mutagenic action on *Emericellopsis glabra*, 105
upper atmosphere, air-sampling system for, 229
upper atmosphere, microorganisms of, 232, 237, 241, 245
uracil, distribution in seawater, 145
uricolysis by *Escherichia*, 474

vaccine, parainfluenza virus, 558
vaccine, Western equine encephalomyelitis, 1011
vaccines, adenovirus, potency of, 839
vaccinia virus, presence on fabrics, 55
vacuum-packaged fish, microflora during storage, 921
vancomycin, activity against *Escherichia coli*, 902
vapor-phase decontamination, 989
vegetable-processing plants, lactic acid bacteria in waste waters of, 115
Venezuelan equine encephalomyelitis virus, detection of, 346
virus, adenovirus, potency of vaccines, 839
virus, coxsackie B-1, salivary excretion of, 394
virus, enterovirus, recovery from foods, 218
virus, foot-and-mouth disease, inactivation of, 86
virus, foot-and-mouth disease, influence of salts on, 206
virus, parainfluenza, effectiveness of vaccine, 558
virus, plant, ascites fluid as source of, 834
virus, Venezuelan equine encephalomyelitis, detection of, 346
virus, Western equine encephalomyelitis, production of vaccine, 1011
virus plaque technique, gradient plate for use in, 470
viruses, activity of 1,3-bis(2-chloroethyl)-1-nitrosourea against, 405
viruses, Columbia SK group, survival of, 361
viruses, dissemination by fabrics, 55
viruses, reoviruses, type-specific antisera to, 1051
virustat, device for continuous production of viruses, 940
viscosity-producing substance in culture media, 836
vitamin B_6, biological assay of, 456
vitamin B_{12}, production with cheese whey, 353, 356, 359
vitamin requirements of *Bacteroides*, 1022
volatile fatty acids, conversion of substrates to, 1004

waste waters, lactic acid bacteria in, 115
water, *Clostridium botulinum* in, 837
water, disinfection with chlorine and bromine, 8
water, foam separation of organisms from, 778
water, growth of lactic acid bacteria in, 115
water activity, adaptation of *Pseudomonas fluorescens* to low levels of, 899
water pollution, intestinal flora of fish as indicators of, 429
water-holding capacity of beef, 492
Western equine encephalomyelitis vaccine production, 1011
wines, effect of pressure on fermentation, 643
wines, fermentation with malo-lactic bacteria, 608

yeast cells, nuclear magnetic resonance spectra of water in, 466
yeast fermentation, glycerol production by, 292
yeasts, in ensiled high-moisture corn, 35
yeasts, role in degradation of coffee cherries, 256
yeasts, steroid mechanisms affecting permeability of, 397

Zytron, effect on soil organisms, 724

INDEX TO DATE OF ISSUE

Month	Date of Issue	Pages
January	1/18/66	1–140
March	3/21/66	141–302
May	5/18/66	303–478
July	7/16/66	479–698
September	9/20/66	699–838
November	12/7/66	839–1066

APPLIED MICROBIOLOGY

A publication of the American Society for Microbiology

Volume 14, 1966

EDITOR

GEORGE M. SAVAGE

EDITORIAL BOARD

CONTENTS

No. 1, January 1966

Microbiology of Drycleaning. Robert R. Banville and Ethel McNeil 1
Algicidal Effect of Bromine and Chlorine on *Chlorella pyrenoidosa*. Yehuda Kott, Galila Hershkovitz, A. Shemtob, and J. B. Sless 8
Enrichment Medium for Selection of *Salmonella* from Fish Homogenate. H. Raj 12
Bacteriological Survey of the Frozen Prepared Foods Industry. I. Frozen Cream-Type Pies. Bernard F. Surkiewicz 21
Method for Measuring Diaminopimelic Acid in Total Rumen Contents and Its Application to the Estimation of Bacterial Growth. K. el-Shazly and R. E. Hungate 27
Microbiology of Ensiled High-Moisture Corn. Harland R. Burmeister, Paul A. Hartman, and Robert A. Saul 31
Yeasts in Ensiled High-Moisture Corn. Harland R. Burmeister and Paul A. Hartman 35
Production of Alanine by *Fusarium moniliforme*. Sebastian L. Carito and Michael A. Pisano 39
Bactericidal Properties of the Concentrated Artificial Kidney Bath Solution. John D. Bower, C. H. Belle, and M. E. Hench 45
Effect of Sodium Chloride and *p*H on the Outgrowth of Spores of Type E *Clostridium botulinum* at Optimal and Suboptimal Temperatures. W. P. Segner, C. P. Schmidt, and J. K. Boltz 49
Quantitative Studies on Fabrics as Disseminators of Viruses. I. Persistence of Vaccinia Virus on Cotton and Wool Fabrics. Robert W. Sidwell, Glen J. Dixon, and Ethel McNeil 55
Enzymatic Techniques for the Study of Pathways of Carbohydrate Utilization in the Rumen. D. L. Palmquist and R. L. Baldwin 60
Influence of Diet and Age on Bacterial Counts of Ileal Digesta and Feces Obtained from Young Calves. P. A. Hartman, J. L. Morrill, and N. L. Jacobson 70
Quantitative Ecology of Psychrophilic Microorganisms. J. L. Stokes and Mary L. Redmond 74
Polypeptide Antibiotic 4205 from a Soil Bacillus. Myrtle Shaw, Rachel Brown, and Ann G. Martin 79
Inactivation of Foot-and-Mouth Disease Virus by Interaction of Dye and Visible Light. O. N. Fellowes 86
Radiation Survival of Food Pathogens in Complex Media. John K. Dyer, A. W. Anderson, and Pisawat Dutiyabodhi 92
Formation of 6-Aminopenicillanic Acid, Penicillins, and Penicillin Acylase by Various Fungi. M. Cole 98
Three Methods of Assessing the Mutagenic Action of Ultraviolet Radiation on the Fungus *Emericellopsis glabra*. L. J. Schwartz and J. F. Stauffer 105
Characteristics of a Proteinase of a *Trichosporon* Species Isolated from Dungeness Crab Meat. Herman S. Groninger, Jr., and M. W. Eklund 110
Growth of Lactic Acid Bacteria in Waste Waters of Vegetable-Processing Plants. J. Orvin Mundt, Sandra A. Larsen, and I. E. McCarty 115
Direct Fluorescent Labeling of Microorganisms as a Possible Life-Detection Technique. Abe Pital, Sheldon L. Janowitz, Charles E. Hudak, and Evelyn E. Lewis 119
Effect of Coliform and *Proteus* Bacteria on Growth of *Staphylococcus aureus*. J. V. DiGiacinto and W. C. Frazier 124
Thermal Inactivation of Staphylococcal Enterotoxin B in Veronal Buffer. R. B. Read, Jr., and J. G. Bradshaw 130

Notes

Carboxymethylcellulose Ether Media for Cold-Weather Aerosol Sampling. Robert E. Lee and Max Garbett 133

Improved Anaerobic Indicator. JOHN H. BREWER, DANIEL L. ALLGEIER, AND C. BAXTER MCLAUGHLIN 135
Effect of Excess Alkali on the Tuberculocidal Activity of Phenates. CHARLES H. SHAFFER, JR., L. S. STUART, AND L. F. ORTENZIO 137
Production of Aflatoxins and Kojic Acid by Species of *Aspergillus* and *Penicillium*. F. W. PARRISH, B. J. WILEY, E. G. SIMMONS, AND L. LONG, JR. 139

No. 2, MARCH 1966

Estimation of Low Numbers of *Escherichia coli* Bacteriophage by Use of the Most Probable Number Method. YEHUDA KOTT 141
Microbiological Assay for Organic Compounds in Seawater. II. Distribution of Adenine, Uracil, and Threonine. CAROL D. LITCHFIELD AND DONALD W. HOOD 145
Colonial Morphology of *Escherichia coli* on Tergitol-7 Medium. RHODES K. SCHERER 152
Metabolism of Linear Alcohols with Various Chain Lengths by a *Pseudomonas* Species. JOY P. WILLIAMS, W. R. MAYBERRY, AND W. J. PAYNE 156
Production and Stabilization of Cells of *Bacillus popilliae* and *Bacillus lentimorbus*. RALPH N. COSTILOW, CHARLES J. SYLVESTER, AND ROLLIN E. PEPPER 161
Simplified, Accurate Method for Antibiotic Assay of Clinical Specimens. JOHN V. BENNETT, JEAN L. BRODIE, ERNEST J. BENNER, AND WILLIAM M. M. KIRBY 170
β-Galactosidase for Distinguishing between *Citrobacter* and *Salmonella*. M. J. PICKETT AND R. E. GOODMAN 178
Quantitative Studies on Fabrics as Disseminators of Viruses. II. Persistence of Poliomyelitis Virus on Cotton and Wool Fabrics. GLEN J. DIXON, ROBERT W. SIDWELL, AND ETHEL MCNEIL 183
Characteristics of the Vegetative Growth of *Bacillus popilliae*. R. A. RHODES, E. S. SHARPE, H. H. HALL, AND R. W. JACKSON 189
Effect of Different Commerical Agar Preparations on the Inhibitory Activities of Phenols. J. G. SANDS AND E. O. BENNETT 196
Effect of Time and Temperature in Assessing Microbial Contamination on Flat Surfaces. D. VESLEY, K. M. KEENAN, AND M. M. HALBERT 203
Influence of Salts on Foot-and-Mouth Disease Virus. O. N. FELLOWES 206
Biochemical Differentiation of the *Enterobacteriaceae* with the Aid of Lysine-Iron-Agar. JANE G. JOHNSON, LAWRENCE J. KUNZ, WINIFRED BARRON, AND W. H. EWING 212
Survival and Recovery of Enterovirus from Foods. RICHARD K. LYNT, JR. 218
Use of the Anaerobic Pouch in Isolating *Clostridium botulinum* Spores from Fresh Meats. RICHARD A. GREENBERG, BENDT O. BLADEL, AND WALTER J. ZINGELMANN 223
Microorganisms of the Upper Atmosphere. I. Instrumentation for Isokinetic Air Sampling at Altitude. DURWARD E. TIMMONS, JOHN D. FULTON, AND ROLAND B. MITCHELL 229
Microorganisms of the Upper Atmosphere. II. Microorganisms in Two Types of Air Masses at 690 Meters over a City. JOHN D. FULTON AND ROLAND B. MITCHELL 232
Microorganisms of the Upper Atmosphere. III. Relationship between Altitude and Micropopulation. JOHN D. FULTON 237
Microorganisms of the Upper Atmosphere. IV. Microorganisms of a Land Air Mass as It Traverses an Ocean. JOHN D. FULTON 241
Microorganisms of the Upper Atmosphere. V. Relationship between Frontal Activity and the Micropopulation at Altitude. JOHN D. FULTON 245
Effect of Lactic Acid Bacteria on Growth of *Staphylococcus aureus*. CLAUDIA T. KAO AND W. C. FRAZIER 251
Role of Pectinolytic Yeasts in the Degradation of Mucilage Layer of *Coffea robusta* Cherries. A. D. AGATE AND J. V. BHAT 256
Effect of γ-Irradiation on the Microflora of Freshwater Fish. I. Microbial Load, Lag Period, and Rate of Growth on Yellow Perch (*Perca flavescens*) Fillets. N. KAZANAS, J. A. EMERSON, H. L. SEAGRAN, AND L. L. KEMPE 261
Modified Agglutination Test for *Pasteurella tularensis*. JOHN J. ENGELFRIED AND FRANCES SPEAR 267
Rapid Fluorescein and Protein Assay Method for Fluorescent-Antibody Conjugates. ARTHUR F. WELLS, CURTIS E. MILLER, AND MARVIN K. NADEL 271

Comparison of Chlorine, Bromine, and Iodine as Disinfectants for Swimming Pool Water. T. A. Koski, L. S. Stuart, and L. F. Ortenzio 276
Influence of Cobalt on Fermentative Methylation. C. A. Claridge, V. Z. Rossomano, N. S. Buono, A. Gourevitch, and J. Lein 280
Rapid Quantitative Serological Assay of Staphylococcal Enterotoxin B. Francis J. Weirether, Evelyn E. Lewis, Albert J. Rosenwald, and Ralph E. Lincoln 284
Pilot Plant Glycerol Production with a Slow-Feed Osmophilic Yeast Fermentation. D. K. Button, J. C. Garver, and G. J. Hajny 292

Notes

Presumptive Method for Determining the Effectiveness of Gas Decontamination of Inanimate Surfaces. B. R. Choman 295
Inhibition of Nucleotide Degradation in *Bacillus subtilis* Broths by Metallic Salts. Arnold L. Demain and David Hendlin 297
Combined Action of Sulfadiazine and Trimethoprim. Peter Warner and A. C. Maniar 299
Isolation of *Clostridium botulinum* Type E from Cayuga Lake Fish. Heather M. Chapman and H. B. Naylor 301

No. 3, May 1966

Survival of Bacteria on Metal Surfaces. T. R. Wilkinson 303
Bacteriostatic, Fungistatic, and Algistatic Activity of Fatty Nitrogen Compounds. Hendrik J. Hueck, Dorothea M. M. Adema, and John R. Wiegmann 308
Comparison of Growth and Primary Shunt Product Formation by *Claviceps purpurea* Cultured on Succinic Acid and Glucose as Carbon Sources. W. A. Taber and R. Siepmann 320
Evaluation of Slit Sampler in Quantitative Studies of Bacterial Aerosols. Richard Ehrlich, Sol Miller, and L. S. Idoine 328
Pigmented Bacteriostatic Substances and Amino Acids Produced by *Phlebopus sulphureus* and *Phlebopus lignicola*. C. Madhosingh 331
Stimulation of Proteinase Biosynthesis by Canavanine in *Streptococcus faecalis* var. *liquefaciens*. Jay M. Hammel and Leonard N. Zimmerman 337
Culture of the Rumen Holotrich Ciliate *Dasytricha ruminantium* Schuberg. R. T. J. Clarke and R. E. Hungate 340
Hemagglutination-Inhibition Method and Immunofluorescence Staining with Venezuelan Equine Encephalomyelitis Virus. Michael Shepel 346
Use of Cheese Whey for Vitamin B_{12} Production. I. Whey Solids and Yeast Extract Levels. L. B. Bullerman and E. C. Berry 353
Use of Cheese Whey for Vitamin B_{12} Production. II. Cobalt, Precursor, and Aeration Levels. E. C. Berry and L. B. Bullerman 356
Use of Cheese Whey for Vitamin B_{12} Production. III. Growth Studies and Dry-Weight Activity. L. B. Bullerman and E. C. Berry 358
Effect of Temperature and Relative Humidity on Survival of Airborne Columbia SK Group Viruses. T. G. Akers, Sheila Bond, and L. J. Goldberg 361
Phenazines as Disinfectants against Bacterial Leaf Blight of the Rice Plant. Makoto Oda, Yasuharu Sekizawa, and Tetsuro Watanabe 365
Kinetics of Acetate Metabolism during Sludge Digestion. Paul H. Smith and Robert A. Mah 368
Influence of Food Microorganisms on Staphylococcal Growth and Enterotoxin Production in Meat. D. W. McCoy and J. E. Faber 372
Production of Aflatoxins B_1 and G_1 by *Aspergillus flavus* in a Semisynthetic Medium. N. D. Davis, U. L. Diener, and D. W. Eldridge 378
Effect of Corn Steep Liquor on Mycelial Growth and Aflatoxin Production in *Aspergillus parasiticus*. Harry W. Schroeder 381
Identification of Fluorescent-Antibody Labeled Group A Streptococci by Fluorometry. Howard M. Hochberg, James K. Cooper, J. J. Redys, and Cesar A. Caceres 386
Use of Bisulfite in the Streptococcal Anti-Nicotinamide Adenine Dinucleotidase Test. Elia M. Ayoub and Joseph J. Ferretti 391

Salivary Excretion of Coxsackie B-1 Virus in Rabbits. JOHN V. MADONIA, ARTHUR N. BAHN, AND JOSEPH C. CALANDRA 394
Steroid Mechanisms Affecting Yeast Permeability and Viability. RODNEY F. SMITH AND DONALD E. SHAY 397
Survey of the Sensitivity of Microorganisms to Aflatoxin. H. R. BURMEISTER AND C. W. HESSELTINE 403
In Vitro Studies on the Antiviral Activity of 1,3-Bis(2-Chloroethyl)-1-Nitrosourea. ROBERT W. SIDWELL, G. ARNETT, AND GLEN J. DIXON 405
Microbial Flora of Irradiated Dungeness Crabmeat and Pacific Oysters. M. A. SHIFLETT, J. S. LEE, AND R. O. SINNHUBER 411
Effect of Available Water on Thermal Resistance of Three Nonsporeforming Species of BACTERIA. C. L. CALHOUN AND W. C. FRAZIER 416
Long-Term Storage of Bacteriophages of Lactic Streptococci. BARBARA P. KEOGH AND G. PETTINGILL 421
Production of Aflatoxin on Rice. ODETTE L. SHOTWELL, C. W. HESSELTINE, R. D. STUBBLEFIELD, AND W. G. SORENSON 425
Bacterial Pollution Indicators in the Intestinal Tract of Freshwater Fish. EDWIN E. GELDREICH AND NORMAN A. CLARKE 429
Biochemical Alterations of Dermatophytes during Growth. R. SWANSON AND J. J. STOCK 438
Clinical Chemistry of Staphylococcal Enterotoxin Poisoning in Monkeys. GERALD J. CRAWLEY, JOHN N. BLACK, IRVING GRAY, AND JACK W. BLANCHARD 445
Effect of Pimaricin on the Resistance of *Saccharomyces cerevisiae* to Heat, Freezing, and Ultraviolet Irradiation. G. K. YORK 451
Liquid Nitrogen Preservation of *Saccharomyces carlsbergensis* and its Use in a Rapid Biological Assay of Vitamin B_6 (Pyridoxine). KIYOSHI TSUJI 456
Liquid Nitrogen Preservation of *Saccharomyces carlsbergensis* and its Use in a Rapid Biological Assay of Pantothenic Acid. KIYOSHI TSUJI 462

Notes

Nuclear Magnetic Resonance Spectra of Water in Partially Dried Yeast Cells. SHOZO KOGA, AKIRA ECHIGO, AND TATUMI OKI 466
Application of an End Point Dilution Method to Bacteriophage Assay. J. C. HOFF AND W. JAKUBOWSKI 468
Modified Gradient Plate for Use in the Virus Plaque Technique. WILLIAM T. SOPER 470
Rapid Serial Dilution Technique with Self-Filling Syringes. G. STOTZKY, R. MUND, AND R. TSUI 472
Uricolysis by *Escherichia* spp. L. N. BARE, R. F. WISEMAN, AND ISAAC RUCHMAN 474
Antibiotic Properties of Malformin. SHOZO SUDA AND ROY W. CURTIS 475
Erratum 477

No. 4, July 1966

Mice and Monkeys as Assay Animals for *Clostridium perfringens* Food Poisoning. K. F. WEISS, D. H. STRONG, AND R. A. GROOM 479
Uptake of 2,4-Dichlorophenoxyacetic Acid by *Pseudomonas fluorescens*. GARY WEDEMEYER 486
Response of the Extract-Release Volume and Water-Holding Capacity Phenomena to Microbiologically Spoiled Beef and Aged Beef. JAMES M. JAY 492
Evaluation of Filters for Removal of Bacteriophages from Air. C. J. WASHAM, C. H. BLACK, W. E. SANDINE, AND P. R. ELLIKER 497
U-21,963, a New Antibiotic. I. Discovery and Biological Activity. THOMAS R. PYKE AND ALMA DIETZ 506
U-21,963, a New Antibiotic. II. Isolation and Characterization. CURTIS E. MEYER 511
Detection and Identification of Bacteria by Gas Chromatography. Y. HENIS, J. R. GOULD, AND M. ALEXANDER 513
Modified Pagano Levin Medium to Isolate *Candida* Species. MICHAEL A. STEDHAM, DONALD C. KELLEY, AND EMBERT H. COLES 525
Growth of *Desulfovibrio* on the Surface of Agar Media. WARREN P. IVERSON 529

Membrane Filtration Technique for Isolating Organisms from Raw Milk of Normal Udders. DONALD C. GRAVES AND I. A. SCHIPPER 535
Comparative Levels and Types of Microbial Contamination Detected in Industrial Clean Rooms. MARTIN S. FAVERO, JOHN R. PULEO, JAMES H. MARSHALL, AND GORDON S. OXBORROW 539
Gas Exchange of Algae. II. Effects of Oxygen, Helium, and Argon on the Photosynthesis of *Chlorella pyrenoidosa*. ELIZABETH C. B. AMMANN AND VICTORIA H. LYNCH 552
Antibody Response of Guinea Pigs to Trivalent Parainfluenza Virus Vaccine Prepared from Embryonated Eggs. JOSEPH L. DEMEIO AND ARMAND N. DESANCTIS 558
Preservation of *Serratia marcescens* by High-Vacuum Lyophilization. ROBERT R. DEWALD. 561
Kinetic Studies on the Destructive Action of Oxygen on Lyophilized *Serratia marcescens*. ROBERT R. DEWALD 568
Effect of *p*H on Population and Fermentation in a Continuously Cultured Rumen Ecosystem. L. L. SLYTER, M. P. BRYANT, AND M. J. WOLIN 573
Fungistatic Effects of Controlled Atmospheres. NEIL A. LITTLEFIELD, BARTLEY N. WANKIER, D. K. SALUNKHE, AND J. N. MCGILL 579
Action of Lincomycin on Staphylococci. M. BALS AND MARIA BRATU 582
Thermal Resistance of *Staphylococcus aureus* in Milk, Whey, and Phosphate Buffer. G. C. WALKER AND L. G. HARMON 584
Elevated-Temperature Technique for the Isolation of *Salmonella* from Streams. DONALD F. SPINO 591
Cultivation of *Pasteurella haemolytica* in a Chemically Defined Medium. G. E. WESSMAN .. 597
Direct Cord Reading Medium for Isolation of Mycobacteria. VICTOR LORIAN 603
Chemical Characterization of Wines Fermented with Various Malo-lactic Bacteria. GORDON J. PILONE, RALPH E. KUNKEE, AND A. DINSMOOR WEBB 608
Antagonistic Effect on *Clostridium botulinum* Type E by Organisms Resembling It. D. A. KAUTTER, S. M. HARMON, R. K. LYNT, JR., AND T. LILLY, JR. 616
Distribution of Thermophilic Aerobic Sporeforming Bacteria in Food Ingredients. B. RICHMOND AND M. L. FIELDS 623
Factors Influencing the Occurrence of High Numbers of Iodine-Resistant Bacteria in Iodinated Swimming Pools. MARTIN S. FAVERO AND CHARLES H. DRAKE 627
Biochemical and Physical Changes in Shaken Suspensions of *Pasteurella pestis*. G. E. WESSMAN AND DONNA J. MILLER 636
Multiplication and Fermentation of *Saccharomyces cerevisiae* under Carbon Dioxide Pressure in Wine. RALPH E. KUNKEE AND C. S. OUGH 643
Production of a Pyrrole Antibiotic by a Marine Bacterium. PAUL R. BURKHOLDER, ROBERT M. PFISTER, AND FREDERICK H. LEITZ 649
Effects of Inhibition and Repression on the Utilization of Substrates by Heterogeneous Bacterial Communities. ELISABETH STUMM-ZOLLINGER 654
Effects of Additives on the Survival of Lactic Streptococci in Frozen Storage. C. A. GIBSON, G. B. LANDERKIN, AND PAMELA M. MORSE 665
Improved Motility Medium. ROBERT J. BALL AND WALTER SELLERS 670
Role of Differential Air Pressure Zones in the Control of Aerosols in a Large Animal Isolation Facility. JAMES F. SULLIVAN AND JOSEPH R. SONGER 674
Nitrogen and Phosphorus Removal from Combined Sewage Components by Microbial Activity. M. S. FINSTEIN 679

Notes

Self-Contained Culture Flask System. JOHN I. PETERSON 685
Freeze-Cutting of Density Gradients. ROBERT BERG AND D. P. DURAND 687
Spore Production by *Bacillus stearothermophilus*. JUHEE KIM AND H. BROOKS NAYLOR 690
Simple Device for Enumeration and Isolation of Luminescent Bacterial Colonies. B. J. COSENZA AND J. D. BUCK 692
Technique for Volume Production of Mouse Ascites Fluid Containing *Bordetella pertussis* Antibody. R. W. MARCH AND DAVID COONEY 693
Apparatus for Rapid Replica Plating in Rhizosphere Studies. J. L. NEAL, JR., K. C. LU, W. B. BOLLEN, AND J. M. TRAPPE 695
Two Types of Simple Automatic Inoculators. BERNARD H. GOLDNER 697

No. 5, SEPTEMBER 1966

Inhibition of Microbial Lipases by Fatty Acids. J. L. SMITH AND JOHN A. ALFORD 699
Fermentation Studies with *Streptomyces griseus*. II. Synthetic Media for the Production of Streptomycin. SHIROH SHIRATO AND HIROSHI MOTOYAMA 706
Comparison of Methods for the Isolation of *Salmonella* from Bone Meal. C. B. GERICHTER AND I. SECHTER 711
Thermal Resistance of *Pseudomonas fragi* in Milk Containing Various Amounts of Fat. L. O. LUEDECKE AND L. G. HARMON 716
Histochemical Observations on *Mycoplasma* after Staining with Acridine Orange. D. E. JASPER AND N. C. JAIN 720
Effect of Zytron and Its Degradation Products on Soil Microorganisms. M. L. FIELDS AND D. D. HEMPHILL 724
Sterilizing Effects of High-Intensity Airborne Sonic and Ultrasonic Waves. MICHAEL A. PISANO, RAYMOND M. G. BOUCHER, AND I. EDWARD ALCAMO 732
Growth and Invasiveness of *Candida albicans* in the Germ-Free and Conventional Mouse After Oral Challenge. A. W. PHILLIPS AND EDWARD BALISH 737
Effect of Diluent and Relative Humidity on Apparent Viability of Airborne *Pasteurella pestis*. WILLIAM D. WON AND HAROLD ROSS 742
Role of Methionine in Cephalosporin Synthesis. P. G. CALTRIDER AND H. F. NISS 746
Durhamycin, a Pentaene Antifungal Antibiotic from *Streptomyces durhamensis* sp. n. M. A. GORDON AND E. W. LAPA 754
Anaerobic Simulated Mixed Culture System. F. D. SCHAUMBURG AND E. J. KIRSCH 761
Quantitative Assay of *Coxiella burnetii* in Mice. MORRIS D. SCHNEIDER, RICHARD EHRLICH, HERBERT M. YAMASHIROYA, AND SOL MILLER 767
Role of Lipid in the Protection of *Staphylococcus aureus* Against Trichlorophenol in Mixed Culture. C. P. TRUBY AND E. O. BENNETT 769
Toxicity to Rats of Corn Invaded by *Chaetomium globosum*. C. M. CHRISTENSEN, G. H. NELSON, C. J. MIROCHA, FERN BATES, AND C. E. DORWORTH 774
Variables Affecting the Foam Separation of *Escherichia coli*. H. W. BRETZ, S. L. WANG, AND R. B. GRIEVES 778
Long-Term Preservation of Fungus Cultures with Liquid Nitrogen Refrigeration. SHUH-WEI HWANG 784
Incidence of Mesophilic *Clostrodium* Spores in Raw Pork, Beef, and Chicken in Processing Plants in the United States and Canada. R. A. GREENBERG, R. B. TOMPKIN, B. O. BLADEL, R. S. KITTAKA, AND A. ANELLIS 789
Medium Without Rumen Fluid for Nonselective Enumeration and Isolation of Rumen Bacteria. DANIEL R. CALDWELL AND MARVIN P. BRYANT 794
Acetaldehyde Utilization by *Leuconostoc* Species. T. W. KEENAN, R. C. LINDSAY, AND E. A. DAY 802
Importance of the Isovalerate Carboxylation Pathway of Leucine Biosynthesis in the Rumen. MILTON J. ALLISON, JERRY A. BUCKLIN, AND I. M. ROBINSON 807
Thermal Resistance of Salmonellae and Staphylococci in Foods. CONSTANCE T. THOMAS, J. C. WHITE, AND KARLA LONGRÉE 815
Production of Guanosine-5′-Monophosphate and Inosine-5′-Monophosphate by Fermentation. A. L. DEMAIN, M. JACKSON, R. A. VITALI, D. HENDLIN, AND T. A. JACOB 821
Aflatoxin Production and Degradation by *Aspergillus flavus* in 20-Liter Fermentors. A. CIEGLER, R. E. PETERSON, A. A. LAGODA, AND H. H. HALL 826

Notes

Ascites Fluid from Immunized Mice as a Source of Plant Virus Antibodies. J. M. REDDECLIFF AND E. H. LUDWIG 834
Separan NP10, a Viscosity-Producing Substance in Culture Media. VICTOR LORIAN AND NANCY GRAY 836
Presence of *Clostridium botulinum* in the Gulf of Venezuela and the Gulf of Darién. BOBBY J. CARROLL, EPHRAIM S. GARRETT, GLADYS B. REESE, AND BENJAMIN Q. WARD 837
Erratum 838

No. 6, November 1966

Potency of Adenovirus Vaccines: Comparison of Unconcentrated, Concentrated, and Soluble Antigen Preparations. R. R. Strauss, N. R. Goulet, O. C. Liu, and J. M. Beiler ... 839
Statistical Evaluation of Electronic and Plate Counts for Estimating Bacterial Populations. G. J. Mountney and J. O'Malley ... 845
Action of Chloramphenicol and Its Isomers on Secondary Biosynthetic Processes of *Bacillus*. Eugene D. Weinberg and Sue M. Tonnis ... 850
Glucose Disappearance in Biological Treatment Systems. John S. Jeris and Raul R. Cardenas, Jr. ... 857
Steroid Interference with Antifungal Activity of Polyene Antibiotics. Walter A. Zygmunt and Peter A. Tavormina ... 865
Formation of the Blue Pigment Indigoidine by Phytopathogenic *Erwinia*. Mortimer P. Starr, Gladys Cosens, and Hans-Joachim Knackmuss ... 870
Inhibition of Swarming of *Proteus* by Sodium Tetradecyl Sulfate, β-Phenethyl Alcohol, and *p*-Nitrophenylglycerine. Rudolf Kopp, Johannes Müller, and Renate Lemme. 873
Prevention of the Emergence of Drug Resistance in Bacteria by Acridines, Phenothiazines, and Dibenzocycloheptenes. Carole S. Heller and M. G. Sevag ... 879
Comparison of Acetate Differential Agar with Sellers Citrate-Mannitol-Agar. Joseph T. Cordaro and Robert J. Ball ... 886
Effect of Air Ions on Submicron T1 Bacteriophage Aerosols. John W. Happ, J. Bruce Harstad, and Lee M. Buchanan ... 888
Simple Cultural Test for Relative Cellulolytic Activity of Fungi. Gopal S. Rautela and Ellis B. Cowling ... 892
Adaptation of *Pseudomonas fluorescens* to Low Levels of Water Activity Produced by Different Solutes. Somluck Limsong and W. C. Frazier ... 899
Effect of Mg^{++} on the Activity of Vancomycin Against *Escherichia coli*. A. D. Russell and I. L. Thomas ... 902
Effect of Electrostatic Charge on the Contamination of Plastic Food Containers by Airborne Bacterial Spores. Lester E. Baribo, John S. Avens, and Richard D. O'Neill ... 905
Survival of *Clostridium perfringens* During Baking and Holding of Turkey Stuffing. Margy Woodburn and Chung H. Kim ... 914
Changes in the Microflora of Vacuum-packaged, Irradiated Petrale Sole (*Eopsetta jordani*) Fillets Stored at 0.5 C. Gertchen A. Pelroy and Melvin W. Eklund ... 921
Examination of Feces from Food Handlers for Salmonellae, Shigellae, Enteropathogenic *Escherichia coli*, and *Clostridium perfringens*. Herbert E. Hall and George H. Hauser ... 928
Microbial Detoxification of Aflatoxin. A. Ciegler, E. B. Lillehoj, R. E. Peterson, and H. H. Hall ... 934
Virustat, a Device for Continuous Production of Viruses. Homer Jacobson and Leslie S. Jacobson ... 940
Intracellular Loss of Potassium in *Candida albicans* After Exposure to Polyene Antifungal Antibiotics. Walter A. Zygmunt ... 953
Effect of γ Irradiation on the Microflora of Freshwater Fish. II. Generic Identification of Aerobic Bacteria from Yellow Perch Fillets. N. Kazanas ... 957
Production of Enterotoxin A. Eiichi Kato, Mahmood Khan, Lubinka Kujovich, and Merlin S. Bergdoll ... 966
Oxidative Metabolism of Dermatophytes. B. C. McBride and J. J. Stock ... 973
Sensitive Rapid Detection Method for Viable Bacterial Cells. Robert A. MacLeod, Marilyn Light, Lloyd A. White, and J. F. Currie ... 979
Safe Self-contained Carbon Dioxide-Hydrogen Anaerobic System. John H. Brewer and Daniel L. Allgeier ... 985
β-Propiolactone Vapor Decontamination. Robert K. Hoffman, Lee M. Buchanan, and David R. Spiner ... 989
Clostridium tetani in a Metropolitan Area: A Limited Survey Incorporating a Simplified in Vitro Identification Test. Thomas R. Byrd and H. L. Ley, Jr. ... 993

Anaerobic Production of *Thiobacillus denitrificans* for the Enzyme Rhodanese. K. Sargeant, P. W. Buck, J. W. S. Ford, and R. G. Yeo 998
Conversion of C^{14}-Labeled Substrates to Volatile Fatty Acids by the Rumen Microbiota. P. Wallnöfer, R. L. Baldwin, and E. Stagno 1004
Western Equine Encephalomyelitis Vaccine Produced in Chick Embryo Cell Cultures. David M. Robinson, Sanford Berman, Joseph P. Lowenthal, and Frank M. Hetrick 1011
Solubilization of Acid-Swollen Cellulose by an Enzyme System from a Species of *Alternaria*. Robert M. Logan and Donald J. Siehr 1015
Effect of Aeration on Growth and Aflatoxin Production by *Aspergillus flavus* in Submerged Culture. A. Wallace Hayes, Norman D. Davis, and Urban L. Diener 1019
Amino Acid and Vitamin Requirements of Several *Bacteroides* Strains. Grace Quinto ... 1022
Pure Culture Fermentation of Green Olives. J. L. Etchells, A. F. Borg, I. D. Kittel, T. A. Bell, and H. F. Fleming 1027

Notes

Rack Permitting Efficient Handling of Tissue Cultures. Samuel Baron, Charles E. Buckler, and Kenneth K. Takemoto 1042
Suppression of *Leuconostoc mesenteroides* During Isolation of Lactobacilli. J. Orvin Mundt and J. L. Hammer 1044
Dispensing Apparatus for Controlling E_h, *p*H, and Volume of Anaerobic Bacterial and Protozoal Culture Media. Phletus P. Williams 1045
Acylation of 6-Aminopenicillanic Acid by *Penicillium chrysogenum*. Raymond C. Erickson and Loretta D. Dean 1047
Effect of Various Inhibitors of Protein and Deoxyribonucleic Acid Synthesis on the Growth of Mycoplasmas. Janusz Borysiewicz 1049
Preparation of Type-specific Antisera to Reoviruses. Abbas M. Behbehani, Lois C. Foster, and Herbert A. Wenner 1051
